

Please reject the NAB's petition 04-160 opposing XM Satellite Radio's traffic and weather channels. The local radio stations in the Seattle area have done at best a mediocre job of providing this service, and I am looking forward very much to having the new XM service. The NAB would be better served to spend its time trying to convince its members that there are people out here who simply cannot stand ranting talk radio shows and rock and country music. If you go along with the NAB on this issue, I will consider your action an attack on ME!
